

A COMMUNITY BY JENN

The Human Side of AI by Jenn

AI conversations. Good food.
Great music. Real life.

MEET JENN

Jennifer Simmons spent 19+ years leading large-scale programs across federal agencies. Now she curates The Human Side of AI by Jenn, a lifestyle platform exploring AI through food, music, culture, and everyday life.

She is not the loudest expert in the room. She is the one who makes it safe to ask the question you were afraid to ask.

***“Coffee is on. Music is playing.
Pull up a chair.”***

WHAT WE ARE ABOUT

AI Conversations

Honest talk. No jargon,
no judgment.

Great Music

The records that keep
the room moving.

Good Food

Tables set and meals
worth lingering over.

Real Life

Leadership, curiosity, and
everything in between.

THE RITUALS

- **Music Monday**
A song to start the week.
- **Sunday Supper**
Slow food, slower conversation.
- **Traeger Sessions**
Low, slow, and smoky.
- **Coffee and AI**
Morning musings on tech, like a chat with a friend.
- **The Jenn Lens**
A personal look at leadership and life.

LET US BUILD SOMETHING

**For partnerships, collaborations,
intimate dinners, and small-room
speaking.**

Small and intimate by design. The table beats the podium.
